PROJECTS

React Weather App

Live site: <https://react-forecast.netlify.app/>
GitHub: <https://github.com/ealsa/react-openmeteo-forecast>

A weather app done with React. Allows you to make a search for the current weather by simply typing cities or countries. It shows you both hourly and daily forecast. It utilizes open-meteo API and react hooks.

Education/School Website

Live site: <https://ealsa.github.io/Education-Website/>
GitHub: <https://github.com/ealsa/Education-Website>

A multipage marketing website built with HTML, CSS, and JavaScript that promotes a fictional education/school program.

React Countries

Live site: <https://countries-rest-api-v3.netlify.app/>
GitHub: <https://github.com/ealsa/rest-countries>

An application that shows every country and details about them. It utilizes Tailwind, React Router, and has a responsive design. The data is coming from Rest Countries API.

React E-Commerce

Live site: <https://basic-react-ecommerce.netlify.app/>
GitHub: <https://github.com/ealsa/react-e-commerce>

An ecommerce website done with React. It utilizes Context API for state management, and tailwind for style and responsive design.
